Have you ever wondered how to get your children to talk about their day? How to help them calm down when they're upset? Or just what to say when a conflict breaks out between siblings? You're not alone! Children hear a lot of language from adults, and the fact that they are still developing communication skills makes for even more nuanced interactions. The good news is that knowledge of child development can help guide you as you choose the best ways to communicate with children, whether it's about their play, their feelings, or their big ideas.

**These events are open to adults of the Bing Nursery School Community.**
